

VOL. XLVII.

RENO, WASHOE COUNTY, NEVADA, WEDNESDAY MORNING, JULY 29, 1896.

NO 103

ADA STATE JOURNAL
Published Daily and Weekly by
Kelley & Webster.

TERMS OF SUBSCRIPTION:
Daily one year, by mail..... \$3.00
Daily, six months, by mail..... 1.50
Daily, by Carrier, per week..... 1.15
Weekly, one year, by mail..... 2.00
Weekly, six months..... 1.00

The Daily, containing the latest telegraphic news, is published every day except Mondays. The Weekly is published on Saturday.

TIME TABLES.

Time of Arrival and Departure of
Trains at Reno.

ARRIVES	TRAIN.	DEPARTS
9:38 p.m.	SOUTHERN PACIFIC.	8:45 p.m.
9:00 a.m.	No. 1, Eastbound fast mail	8:10 a.m.
5:00 a.m.	No. 2, Westbound Express	9:40 a.m.
9:27 p.m.	No. 3, Westbound	8:50 p.m.
9:45 p.m.	YANKEE & TROOPER.	9:30 p.m.
9:45 p.m.	No. 1, Virginia Express	9:30 p.m.
11:40 a.m.	No. 2, San Joaquin Express	1:45 p.m.
1:15 p.m.	No. 4, Local Passenger	1:45 p.m.
	R. C. O. R.	
	Express and Freight	8:00 a.m.

Time of Arrival and Departure of
Mail at Reno.

MAIL	ARRIVES	CLOSES.
San Francisco, Sacramento and points in California	8:15 a.m.	3:00 p.m.
Carson, all Eastern points	8:15 a.m.	3:00 p.m.
Carson, Virginia and all Southern points	8:30 p.m.	9:00 a.m.
San Francisco and all points north	1:15 p.m.	8:00 a.m.

Buffalo, Meadows and Sheephead mail arrives every Thursday at 4:15 p.m. and close every Friday at 8:00 a.m.

V. & T. looked pouch from Virginia and Carson arrives at 4:45 a.m. Mail for same closes at 1:30 p.m.

Postoffice Hours:

From 9:00 a.m. to 6 p.m. Sundays from 9 to 10 a.m.

CATARREH

is a LOCAL DISEASE
and is the result of colds and
other climatic influences.

It can be treated by a recent
remedy which is applied directly to the nostrils.

It is a simple salve and it gives
relief at once.

Ely's Cough Salve

is acknowledged to be the most thorough cure for

Nasal Catarrh, Cold, Cough and Hay Fever of all
kinds. It is a simple salve and it gives relief at once.

It is a simple salve and it gives
relief at once.

W SANDERS,

Funeral Director.

GRADUATE OF
Clarke's School of Embalming.

Preparation of bodies for transportation a specialty.

A complete stock of
UNDERTAKER'S SUPPLIES

Always on hand.

Being owner of Hillside Cemetery, parties desiring burial plots will profit by purchase of my direct mail and not through other parties.

All prices reasonable and first class work guaranteed.

Undertaking, Parlors, in Opera House Building, cor Plaza and Sierra streets.

UNDERTAKING.

HAVING one of the Largest and most varied stocks of Undertaking goods in Nevada, I am prepared to give my patrons the best quality goods at the most reasonable prices.

EMBALMING A SPECIALTY,

And Everything Up to Date.

Office—One door east of Opera House, Reno, Nevada.

G. HOSKINS, Prop.

OLD PALACE BAKERY.

Woolen & Gulling, Prop.

WHO employ the Expert Bakers they have had for the last sixteen months. Patrons may be assured of

The Best Bread, Pies and Cakes,

Home-Made Doughnuts,

Pure Ice Cream and Ice Cream Soda.

Goods delivered in any part of town free.

And Horses Boarded by the Day, Week or Month at Terms to Suit the Times.

I have also a large hay yard with good stables. Also corral all watered loose.

HEARSE TO LET.

ERIE MEDICAL CO., BUFFALO, N.Y.

A PILLOW OF PINE
I rest on a pillow of pine, brought home from the summer mountains. The balm of its needles is soothing, and grate full feel to the hands. The touch of the pine balsam of the friends that gathering remembred me. And yet the aroma it yields takes me farther than summer mountains.

Takes me down to the forests of pine in Virginia and North Carolina.

Again ride I go and sleep in the woods and by roadways.

Again I am with companions and implements of warfare.

I hear the drum and the fife and the bugle's

call to action.

The bugle's call to their fire, and the squadrons charge like demons.

And from rude made breastworks come show

ers of lead like stalactites.

While the guns goes up or down as success

crosses our endeavors.

Then we are in the forest, but a fire is

aching its way through.

While helpless, he is still consumed in the

terrible havoc.

And men are dying with thirst in the grim of

the conflict unending.

The most frequent cause of sickness in women is the cause last looked for.

A woman will go to a doctor when she has

a severe cold, or some acute digestive disturbance, but she hesitates and procrastinates.

The trouble is with the distinctly

marked organic disease.

It is the most serious

sickness that any woman can have.

It is the most dreadful—the most dangerous.

Its consequences are always serious, and

its sight and beholding of a woman

is dismaliating.

It seizes the life and strength.

It leaves the body to a skeleton.

It leaves the color goes from the face and

hollows out into the chin.

Irritability increases and the patient becomes

more and more irritable.

It becomes more and more miserable.

The woman is killing herself with neglect

just as surely as if she were taking deadly

poison.

Perhaps her husband cannot

perceive her suffering to the extent that she

naturally does the inevitable examinations

and "local treatments."

He can perceive her, if she needs persuasion, to take

Dr. Pierce's favorite prescription.

This truly wonderful medicine has cured hundreds of women who were told by the best physicians that they had no chance.

It has been in constant use and

tried and tested every day for 30 years.

It is not an experiment, there are no chances about it.

It is a certain and infallible cure for all derangements peculiar to women.

Those who know all about it and to

receive the best medical advice are invited

for the general public to send an

one cent stamp to cover cost of mailing

and receive a copy of Dr. Pierce's

thousand page book, "Common Sense Medical Adviser," Address World's Dispensary Medical Association, Buffalo, N.Y.

Well Known Sculptor Describes It as the

Perfect One Should Be.

"I find great difficulty in getting a

model with good arms," said a well

known sculptor recently.

"It is astonishing how very few women have arms

that conform to the standard.

A perfect arm measured from the

elbow should be twice the length

of the head.

The upper part of the arm

should be large, full and well rounded.

The forearm must not be too fat, not

nearly so fat as a man's, for example.

A dimple at the elbow adds beauty to a

well proportioned arm.

From a well molded shoulder the

whole arm should taper in long, graceful

curves to a symmetrical and rounded

wrist.

It is better to have an arm that

harmonizes even if the parts do not fol-

low the generally accepted lines.

For instance, a full, round upper arm which is joined to a flat or thin forearm which has a very bad effect.

It is only a degree worse, however, than a graceful, well

molded forearm tacked on to a thin,

swarthy upper arm.

Apparently the chain and the cold

had not completely destroyed the fa-

male tendency to scold, for it was found

necessary to invent another punishment,

which was extensively adopted, although

not authorized by the law.

This was the "brand," or "scold's bistle," which

consisted of a small cage formed by iron

hoops to fit the head, with a piece of

iron which passed through the nose.

Two iron bars were placed

across the cage, so that the nose was

caught between them.

When the head was turned to the

right, the bars would catch the nose.

NEVADA STATE JOURNAL

WEDNESDAY, JULY 29, 1896.

L. P. FISHER, NEWSPAPER ADVERTISING AGENT, 21 Merchants' Exchange. This paper is kept on file in his office.

FOR PRESIDENT,
WILLIAM J. BRYAN,
OF NEBRASKA.

FOR VICE PRESIDENT,
ARTHUR SEWALL,
OF MAINE.

SILVER PARTY CONVENTION.

The call for the State Convention of the Silver party to be held at Elko September 8 is published in the Journal. The primaries for the election of delegates are to be held under the State law August 22d. The test requires voters to pledge their support to Bryan and Sewall for President and Vice President of the United States. This will tend to keep those who prefer Watson to Sewall for Vice President from voting at the primaries and, unless a compromise is effected, may result in the nomination of two electoral tickets, one for Bryan and Sewall, and the other for Bryan and Watson. This should be avoided as it would divide the Bryan vote, and it can be prevented if wise counsel prevails.

As it is Bryan is the nominee of the Democrats, the Silver party and the Populists for President. Sewall is the nominee of the Democrats and the Silver party for Vice President and Watson is the nominee of the Populists for that office. If arrangements can be made by which there will be an equitable division of the electoral vote for Vice President, and of State offices, there is no good reason why all three of the parties, if they wish to maintain separate organizations, cannot nominate the same persons for all the offices and insure at least three-fourths of the votes of the State for the ticket.

The JOURNAL has no axe to grind. It does not want to endanger an electoral vote for Bryan, the champion of free coinage and the people's cause. It is like the old fireman, when the question of painting the "mashie" came before the company, and he was called upon for his opinion as to the color. Rising to his full height he said: "Boys, paint her any color you please, so she is red." We don't care a snap how the offices are divided so Bryan electors are chosen and a free coinage President and Congress are elected.

NEW SILVER CERTIFICATES.

The Treasury Department has issued a new one dollar silver certificate for which the demand is great. Banks in nearly all parts of the country have sent in orders for the notes. The Treasury officials have been obliged to limit the amount that will be issued to any one bank to \$500. Some banks have offered gold for the new notes and they have been accommodated.

The notes for which the demand is greater than the supply are redeemable in standard dollars. There is about 130,000,000 ounces of silver bullion in the Treasury owned and paid for by the Government. This bullion could be coined into silver dollars, and those who preferred paper to the coins could be accommodated by giving them silver notes. No one would be injured and many would be benefited by doing that. At least one of the mints is idle and that at New Orleans is not running steadily, when both could be coining money at a great profit to the public.

But instead of pursuing this common sense policy the Administration insists on paying all obligations in gold, letting the mints rust in idleness and the silver bullion remain stacked in the Treasury vaults where it is as useless as its bulk in cobble stones. But that is the policy of the single standard men, and the Republican National Convention says it shall not be changed unless foreign nations consent. Judging by the spirit evinced in the three National conventions recently held, and in each of which Bryan was nominated for President, the people of the United States are determined that the bullion stored in the Treasury shall be coined and that the mints shall be open to silver as well as gold without the consent of foreign nations.

THE SITUATION IN MAINE.

Edward B. Winslow, who was nominated by the Democratic State Convention for Governor of Maine, has formally declined the nomination. The State Convention was held June 17th, and while there were many delegates in favor of free coinage, a single gold standard platform was adopted. Since then Arthur Sewall of Maine was nominated for Vice President by the National Democratic Convention on an unequivocal free coinage platform. This placed both candidates in an embarrassing position, one advocating the bimetallic standard, and the other the single gold standard. Now Winslow has withdrawn and it is probable that another convention will be held and a candidate nominated on a free coinage platform.

It is believed that the declination of Winslow and the adoption of a silver platform will give the silver men a fighting chance in Maine. Solon Chase, who canvassed the State with "them steers" some years ago, and carried it, too, against the Republicans, is fighting bravely for silver. Chase had a novel, but effective method of electioneering. He had a picture of a yoke of oxen painted on a canvas which he displayed to the audience. "Them steers,"

he said, cost him a certain sum, but in consequence of the contraction of the currency, he could not dispose of them for more than half what they cost him. All the eloquence and logic of James G. Blaine could not disprove the plain assertions of Solon Chase, and the State left the Republican column, and Chase and "them steers" acquired a more than national reputation. This year Chase and "them steers" are for Bryan and free coinage and there is a probability that the electoral vote will be given to the people's champion.

THE DURRANT CASE.

It Goes to the Supreme Court on Appeal.

SAO FRANCISCO, July 28.—The case of Theodore Durrant, convicted of murdering Blanche Lamont, went to the Supreme Court to-day. The whole of the long transcript on appeal, numbering 2,400 pages, bound in three volumes, has been completed and signed by the trial judge and is now ready for presentation before the Supreme Court. The argument for the certificates of probable cause will be held to-morrow before Chief Justice Beatty in chambers.

TELEGRAPHIC NOTES.

Chairman Hanna of the Republican National Committee is in Chicago to meet Quay and Hobart and consult on campaign matters.

Governor Holcombe of Nebraska, Populist, believes Bryan will accept the Populist nomination. There will certainly be fusion in Nebraska and the fusionists will carry the State.

An explosion of giant powder used in street work at Victor, Colorado, broke many windows and injured many people, though none were killed. The city will have to pay damages.

The Coroner's inquest on the body of Albert L. Steison in San Francisco found that he came to his death by a gunshot wound inflicted by himself during temporary aberration of the mind.

A German literary campaign bureau has been organized by the gold men with headquarters at Chicago and New York. It is expected by distributing single standard literature among Germans to get their support for McKinley.

The New York Democratic State Committee has decided to call a convention at Buffalo, September 16th, for the nomination of State officers. The general sentiment was in favor of endorsing the National candidates.

Evidences of fraud have been discovered in the Register's office, San Francisco. Many applicants for positions on the precinct boards registered in precincts where they did not reside to get appointed on election boards.

Kate Powers, a woman 45 years of age, employed as a domestic, was found dead in her bed in Los Angeles. The coroner's jury found that she had been accidentally asphyxiated, a bureau having been moved against a jet, turning on the gas.

The Populist State Convention of Tennessee met yesterday and elected J. H. McDowell temporary chairman. He said he was instructed by Senator Butler to say that when the Electoral College meets there will be a hundred Populists present who will say "we shall have our Vice President or you shall not elect Bryan."

PUT UP OR SHUT UP.

A Challenge Open to Any Baseball Club in the State.

The Silver Star Baseball Club of Virginia City seems to be doing a good deal of talking through their hats about being the champions of the State. If they are such fine players let them send a forfeit to the Evening Gazette, in any amount they want to play for, and it will be immediately covered and a game arranged for. If the Virginia boy's don't want "fish or cut bait," possibly there is another club in the State that wants to play for money. If so, send along your forfeit and it will be covered.

DAN O'KEEFE, 1/281 Manager Reno Champions. For over Fifty Years

Mrs. Winslow's Soothing Syrup has been used by millions of mothers for their children while teething. It disturbed at night and broken of your rest by a sick child suffering and crying with pain of cutting teeth, send at once and get a bottle of Mrs. Winslow's Soothing Syrup for children teething. It will relieve the poor little sufferer immediately. Depend upon it mothers, there is no mistake about it. It cures Diarrhea, regulates the Stomach and Bowels, cures Wind Colic, softens the grums reduces Inflammation and gives Tone and Energy to the whole system. Mrs. Winslow's Soothing Syrup for children teething is the best and the prescription of one of the oldest and best female physicians and nurseries in the United States. Price twenty-five cents a bottle, sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup."

Coronado Coronado! Natural mineral water bottled at the springs, near the Hotel Del Coronado, California. H. J. Thyes, State Agent, has secured a carload and is now prepared to supply the trade and families cheaper than any mineral water ever placed on this market. All orders promptly attended to.

Vivian. Vivian is more of a food than a medicine. I should be glad to have those who do not understand its use, call and get Health Book free and read the home testimonials. Vivian sales in 1895 exceeded those in 1894 by half a million dollars. Mrs. B. E. Hunter, Fourth Street.

Chevy Footwear. Now is the time to secure cheap shoes at cost. Tassell Brothers are closing out some of their lines of shoes, and will dispose of them at a bargain. Call and make your selection at once. 6-271.

A BOY AND A BALLOON.

Our Business Was Interrupted In Our Department Store.

The small boy had purchased a rubber balloon in the toy department.

He was tagging after his mother in the toy department when some one jolted against him so that he let go of the string. The rubber balloon floated upward until it reached the ceiling.

The boy howled in dismay, and his mother dropped her bundles, imagining that some one had walked on him.

There was the balloon bobbing against the ceiling.

The boy held up his hands toward it and demanded that it be returned to him. His mother gathered up her bundles and scolded him for being careless.

Then the aisle became blocked with people who offered suggestions.

"Get a long fishing pole," said one.

"How did it happen?" asked another.

"How long will it stay up there?"

"I don't see how I can get it," said he.

"Oh, you ought to get it for the boy," said a large man, who had established himself as master of ceremonies. "You bought the balloon here in the store, didn't you?"

"I don't know," said the boy.

"She bought the balloon here in the store," said the large man to the porter. "I think if you get a long window pole and stand on that highest shelf that you can fish it down."

It was a 5 cent balloon, but the porter went after it as if it were the bag of gold that hangs from every rainbow.

He found the pole and climbed to the high shelf. Several hundred people stopped their shopping and watched him for five minutes as he vainly poked in an effort to fasten the end of the window pole in the dangling string.

At last he was successful.

The balloon was slowly hauled down, to the intense gratification of every one except the small boy, who had become interested in a small aquarium containing goldfish.—Chicago Record.

COLOR IN PLANTS.

The Most Important Coloring Substance in the World Is Chlorophyll.

Chlorophyll is perhaps the most important coloring substance in the world. It is the chief coloring substance of plants, the synthesis of complex compounds from carbon dioxide and water processes, upon which the existence of all living things is ultimately dependent. Only in a very few few instances devoid of chlorophyll are there found complex from sun, water, and air.

Chlorophyll may only be comprehended in its chief physical properties are understood.

These may be best illustrated by placing a gram of chopped leaves of grass or pelargonium in a few cubic centimeters of strong alcohol for an hour.

Such a solution will be of a bright, clear green color, and when the vessel containing it is held in such a manner that the sunlight is reflected from the surface of the liquid it will appear blood red, due to its property of fluorescence, that of changing the wave length of the rays of light of the violet and of the spectrum in such a manner as to make them coincide with those of the red end.

It is, by examination of light which has passed through a solution of chlorophyll, however, that the greatest insight into its physical properties may be gained. If such a ray of light is passed through a prism and spread out on a screen, it may be seen that there are several large intervals of dark bands in the spectrum. The rays of light which would have occupied these spaces have been absorbed by the chlorophyll and converted into heat and other forms of energy. This energy is directly available to the protoplasm containing the chlorophyll, and by means of it the synthesis of complex substance may be accomplished.

BREVITIES.

Genesey & Savage, plumbers.

Plumbing at Lange & Schmitt's. Every teamster should have Trib.

W. A. Harms is O. K. at cane work on chairs. *jw2sw2*

Have you catarrh. Use Liquid Viara.

Chas. May was an arrival on the V. & T. last night.

W. D. Tobey of Carson changed cars for the west last night.

Miss Flo Layton is visiting Miss Mattie Murphy of Carson.

Lawn mowers and garden hose re-
duced by Lange & Schmitt.Refrigerators sold on easy install-
ments by Lange & Schmitt.

Theo. Winters returned from the east last evening and remained over.

Get your bed lounges made over and re-covered by W. A. Harms. *jw2sw2*For a large and sweet loaf of bread go to the New Palace Bakery. *m2ltf*

Judge Mack of the First Judicial District spent the day here yesterday.

The Comstock had another earth-
quake experience yesterday forenoon.

Good family horse, buggy and harness for sale cheap. See advertisement.

Miss Roade arrived from Franktown last evening and registered at the Arcade.

Mac Sampie returned to Amedee yesterday morning after a short visit to his parents.

A. C. St. Louis beer per bottle, 30 cents; the best Eastern beer on the market at Thybes.

Ice cream freezers, fruit presses, fruit jars and cans, and jelly glasses cheap at Lange & Schmitt. ***

Trib is clean; its odor pleasant; mild yet powerful; fulfills all promises. As a liniment, Trib is supreme.

Have you piles? Use Sano, prepared by the Viavi Company. It reaches the worst cases. Try it.

Mrs. Goss, mother of Captain Goss of the Riversides, took the train for California last night.

Good for man, good for horse, Trib penetrates and cures bruises, sprains and swellings. Trib does not blister.

W. A. Harms makes over mattresses and spring beds and returns them the same day. Call at G. Hoskins'. *jw2sw2*

Read Baron Rothschild's proclamation in the 50-cent column. He says no middle-of-the-road for him, but straight goods is his motto.

Nevada papers which advocate the gold policy are filling their columns with apologies for their treachery to the interests of the country.

Charlie Becker has lanterns, par-
sols and other decorations for the bicycle parade next Friday night. Call early and make your selections.

Mrs. E. R. Smith received a telegram that her mother, Mrs. J. W. Killeen had died at Butte, Montana, at 9 o'clock yesterday morning. No particulars were received.

Genuine Belfast and Dublin ginger ale, sassafras sour and an ever running stream of pure and sparkling soda water and the best of ice cream at the New Palace Bakery. *jw2sw2*

Grenadine and Rock Candy syrup, 50 cents per bottle; liquors of all kinds by the pint, bottle or gallon; better goods for less money than any store in town at Thybes.

Alfred Nelson has a fine stock of cigars, tobacco, smokers' articles and novelties. His line of gents' furnishing goods is complete and marked down to bedrock figures. *jw2sw2*

Mrs. Brower (nee Ada Harris), formerly of Dayton, arrived on the V. & T. last night and will visit friends in Reno. Mrs. Brower will be remembered as a teacher in the High School here.

S. T. Rogers, Toronto; L. B. Ladd, Winnemucca; T. H. Smith, California; Miss Dolan, Bodie; Miss Kinsley, Wellington, W. P. Brockett, Topeka; Theo. Winters and wife, Washoe; registered at the Hotel Reno last night.

Very many persons have quit the *Call* and *Chronicle* and are now taking the *Examiner* and *Sacramento Bee*. The *Call* and the *Chronicle* advocated the silver cause until Hanna declared for gold; the *Examiner* and *Bee* are for free coinage.Three kinds of beer, take your choice—Lemp's Fabst or Wieland's. Rich milk punches, Napa soda lemonades and all other cool and refreshing drinks prepared and served by experienced mixers at Henry Ritter's. The jobbing trade a specialty. *jj2sw1*

Mr. Louis Dorais, scientific optician, has located in rooms over Toronto Restaurant. Hours from 10 to 5, and in the evening from 7 to 8. He is prepared to diagnose and treat all eye troubles from an optical standpoint. Examinations free and satisfaction guaranteed.

Every person owning a bicycle should turn out with the Reno wheelmen Friday evening. The boys are using their spare time in making transparencies and decorating their wheels, and everyone that can should witness the parade. It will be worth seeing. Among the transparencies will be some take-offs on Reno's "good roads."

POPULIST PLATFORM.

Government Ownership of Railroads and Telegraph Lines. The People's party, assembled in National Convention, re-affirms its allegiance to the principles declared by the founders of the Republic, and also to the fundamental principles of just government as enunciated in the platform of the party in 1892. We recognize that through the connivance of the present and preceding administrations, the country has reached a crisis in its national life as predicted in our declaration four years ago, and that prompt and patriotic action is the supreme duty of the hour.

We realize that while we have political independence our financial and industrial independence is yet to be obtained by restoring to our country the constitutional control and the exercise of the functions necessary to a people's Government, which functions have been basely surrendered by our public servants to corporate monopolies. The influence of European money changers has been more potent in shaping legislation than the voice of the American people. Executive power and patronage have been used to corrupt our Legislatures and defeat the will of the people, and plutocracy has thereby been enthroned upon the ruins of the democracy. To restore the Government intended by the fathers and the welfare and the prosperity of this and future generations, we demand the establishment of an economic and financial system which shall make us masters of our own affairs, and independent of European control, by the adoption of the following declaration of principles:

FINANCE.

First—We demand a national money, safe and sound, issued by the general Government only, without intervention of banks of issue, to be a full legal tender for all debts, private and public, a just, equitable and efficient means of distribution direct to the people and through the lawful disbursements of the Government.

Second—We demand the free and unlimited coinage of silver and gold at the present legal ratio of 16 to 1, and without waiting for the consent of foreign nations.

Third—We demand the volume of the circulating medium be speedily increased to an amount sufficient to meet the demands of the business and population of this country, and to restore the just level of prices of labor and production.

Fourth—We denounce the sale of bonds and the increase of the public interest-bearing debt made by the present administration as unnecessary and without authority of law, and we demand that no more bonds be issued except by specific act of Congress.

Fifth—We demand such legislation as will prevent the demonetization of the lawful money of the United States by private contract.

Sixth—We demand that the Government in payment of its obligations shall use its option as to the kind of lawful money in which they are to be paid, and we denounce the present and preceding administration for surrendering this option to the holders of Government obligation securities.

Seventh—We demand a graduated income tax, to the end that aggregated wealth shall bear its just proportion of taxation, and we regard the recent decision of the Supreme Court relative to the income tax law as a misinterpretation of the Constitution and an invasion of the rightful powers of Congress over the subject of taxation.

Eighth—We demand that postal savings banks be established by the Government for the safe deposit of the savings of the people and to facilitate exchange.

TRANSPORTATION.

First—Transportation being a means of exchange and a public necessity, the Government should own and operate the railroads in the interest of the people, on a non-partisan basis, to the end that all may be accorded the same treatment in transportation, and that the tyranny and political power now exercised by the great railroad corporations, which result in the impairment, if not the destruction of the political rights and personal liberty of the citizen, may be destroyed. Such ownership is to be accomplished gradually in a manner consistent with sound public policy.

Second—The interest of the United States in the public highways built with public moneys and the proceeds of extensive grants of land to the Pacific railroads should never have been alienated, mortgaged or sold, but guarded and protected for the general welfare as provided by the law organizing such railroads. The foreclosure of existing liens of the United States roads should at once follow default in the payment thereof, by the debtor companies, and at the foreclosure sales of said roads the Government shall purchase the same if it becomes necessary to protect its interests, or if they can be purchased at a reasonable price, and the Government shall operate said railroads as public highways for the benefit of the whole people, and not in the interest of the few, under suitable provisions for protection of life and property, giving to all the transportation interests equal privileges and equal rates for fares and freights.

Third—We denounce the present infamous schemes for refunding the said debts, and demand that the laws now applicable thereto be executed and administered according to their true intent and spirit.

Fourth—The telegraph, like the post-office system, being a necessity for the transmission of news, should be owned and operated by the Government

Highest of all in Leavening Power.—Latest U. S. Gov't Report

Royal Baking Powder
ABSOLUTELY PURE

the interest of the people.

WATSON WILL ACCEPT.

LAND, First—The true policy demands that national and State legislation shall be such as will ultimately enable every prudent and industrious citizen to secure a home, and therefore the lands should not be monopolized for speculative purposes. All lands held by the railroads and other corporations in excess of their actual needs, should be lawfully re-claimed by the Government, and held for actual settlers only, and private land monopoly as well as alien ownership, should be prohibited.

Second—We condemn the frauds by which the land grants to Pacific railroad companies have, through the connivance of the Interior Department, enabled multitudes of bona fide settlers of their homes and miners of their claims, and we demand legislation by Congress which will enforce the exemption of mineral land from such grants after as well as before patenting.

Third—We demand that bona fide settlers on all public lands be granted free homes, as provided in the national homestead law, and that no exception be made in the case of Indian reservations when opened for settlement, and that all lands not now patented come under the same rule.

DIRECT LEGISLATION.

We favor a system of direct legislation through the initiative and referendum under proper constitutional safeguards.

GENERAL PROPOSITIONS.

First—We demand the election of President, Vice President and United States Senators by direct vote of the people.

Second—We tender to the patriotic people of Cuba our deepest sympathy in their struggle for political freedom and independence, and we believe the time has come when the United States, the great Republic of the world, should recognize that Cuba is, and of right ought to be, a free and independent state.

Third—We favor home rule in the Territories, and the District of Columbia, and the early admission of Territories as States.

Fourth—All public salaries should be made to correspond to the price of labor and its products.

Fifth—In times of great industrial depression, idle labor should be employed on public works as far as practicable.

Sixth—The arbitrary course of the Court in assuming to imprison citizens for indirect contempt and ruling them by injunction should be prevented by proper legislation.

Seventh—We favor just pensions for every disabled Union soldier.

Eighth—Believing that the elective franchise and an untrammeled ballot are essential to a government of, for and by the people, the People's Party condemns the wholesale system of disfranchisement, adopted in some of the States as un-Republican and un-Democratic, and we declare it to be the duty of the several State Legislatures to take such action as will secure a full and free and fair ballot and an honest count.

Ninth—While the foregoing propositions constitute the platform which our party stands upon, and for their vindication its organization will be maintained, we recognize that the great and pressing issue of the pending campaign upon which the Presidential election will turn, is the financial question, and upon this great and specific issue between the parties we cordially invite the aid and co-operation of all organizations and citizens agreeing with us upon this vital question.

Democratic Club.

The Bryan Silver Democratic Club met in the Thompson Hall last evening. Owing to a misunderstanding as to the date of meeting there was not as large an attendance as was expected. Chas. Stoddard, President of the Club, stated that in his opinion it was the intention of the club to work in unison with the other Bryan club, as both organizations are working for the same object, and that he did not believe that this club was organized in opposition to the other and that he thought they should unite.

H. H. Beech was present and upon being called upon, made a vigorous speech in favor of unification, claiming that all men in Nevada should work in harmony and to elevate and accomplish the ends that were of such vital importance to the State of Nevada.

The meeting then adjourned, subject to the call of the chair.

Condensed Testimony.

Chas. B. Hood, Broker and Manufacturers Agent, Columbus, Ohio, certifies that Dr. King's New Discovery has no equal as a cough remedy. J. D. Brown, proprietor of St. James Hotel, Fort Wayne, Ind., testifies that he was cured of a cough of two years standing, caused by La Gripe, by Dr. King's New Discovery. B. F. Merrill, Baldwinville, Mass., says that he has used and recommended it and never knew it to fail, and would rather have it than any doctor, because it always cures.

Mrs. Hemming, 222 E. 25th street, Chicago, always keeps it at hand and has no fear of croup because it instantly relieves. Free trial bottles at S. J. Hodgkinson's drug store.

BREVITIES.

Dr. A. Gibson is expected to arrive from St. Louis to-day.

Miss Special Jacobs arrived from Carson last evening and remained over.

Miss Williams of Susaville arrived on the N.C.-O. last night and continued west.

The Misses Mamie and Nellie Epstein of Carson changed cars for the west last night.

Miss Woodbury arrived on the V. & T. last night and took the train for California.

If anyone should find the metal cut of a patent gate they will confer a favor by returning it to this office. It was lost in Reno on Monday.

The State Fair.

The date for holding the annual State Fair is announced in another column.

It will commence on September 21st and continue to and including the 26th.

Many new and interesting features will be introduced. Every effort will be made to make this one of the grandest and most successful Fairs ever held in the State, and to this end the aid and encouragement of the citizens of Nevada and of the adjacent counties of California is earnestly asked.

A visit to Reno at the time of the year named is always enjoyable and seldom without profit, if not in a pecuniary way, the information gained by visitors to our town of its resources, the advantages of trade, etc., cannot be otherwise than profitable.

Full information will be found on the large bills or will be given by addressing J. F. Emmitt, Secretary.

Did You Ever

Try Electric Bitters, as a remedy for your troubles? If not, get a bottle now and get relief. This medicine has been found to be peculiarly adapted to the relief and cure of all Female Complaints, exerting a wonderful influence in giving strength and tone to the organs. If you have loss of Appetite, Constipation, Headache, Fainting Spells, or are Nervous, Sleepless, Excitable, Melancholy or troubled with Dizzy Spells. Electric Bitters is the medicine you need. Health and strength are guaranteed by its use. Large bottles only 50c at S. J. Hodgkinson's, Drug Store.

Not So Insane After All.

J. C. Craggin, a man who was arrested here a few days ago and committed to the Asylum, was discharged yesterday. Upon arriving in town he rented a bicycle at Harris' Cyclery, presumably to ride about town. He is an expert rider and immediately started westward at a rattling pace and the next seen of him was at Laughton's spinning along at a 20-mile gait. The wheel not being returned, Mr. Harris began an investigation and upon finding out the situation wired to Verdi to have him taken in.

An Outing

H. W. Higgins has arranged to give an excursion on Lake Tahoe. Conveyances will be furnished and the party taken to Incline over the new Tahoe road. A steamer will touch there and take the excursionists around the lake. The party will leave here next Saturday at an early hour so as to catch the steamer. The trip from Reno, including the steamer excursion and return, will cost \$1.25. The party will be limited to twenty-five, hence application should be made early to Mr. Higgins.

A CHILD ENJOYS

The pleasant flavor, gentle action and soothing effect of Syrup of Figs, when in need of a laxative, and if the father or mother be constive or bilious, the most gratifying results it uses; so that it is the best family remedy known and every family should have a bottle.

Special Sale.

A large and complete line of men's footwear at S. Jacobs', the leading clothier. Over twenty cases have arrived and they will be sold by special sale at \$1.50, \$1.75 and \$2 a pair. Come early and avoid the rush.

The Sacramento Bee says: "The Chairman of the National Committee of the Silver party is Charles D. Lane of California, one of the largest gold miners in the world. What becomes of the campaign cry that the silver craze has been inaugurated in the interest of the owners of silver mines alone?"

LEE AND MCLELLAN.

Their First Meeting as Described by the

Letter After the Civil War.

Entertaining papers giving reminiscences of "The Lost Cause" were read in this city at a meeting of the Daughters of the Confederacy. In a paper prepared by Mr. George Savage and read by Mrs. D. Grand Wright was described the first meeting of General Robert E. Lee and General George B. McClellan, as General McClellan had related the facts to Mr. Savage in the summer of 1878.

"It was near the City of Mexico during the Mexican war," said General McClellan to Mr. Savage, "that I first met my future great opposing commander. I was a Lieutenant of engineers and Lee was a major of engineers and a favorite on the staff of General Winfield Scott. I was walking across a field one day when I saw General Scott and his staff approaching on horseback. As the party drew near to me Major Lee turned up his horse and addressed me in an angry tone, said:

"Lieutenant, don't you know you are disobeying orders? What is your name?"

"I told him my name was McClellan and that I did not know I was disobeying orders."

"All officers have been told to remain in their quarters and await orders," he exclaimed, still appearing very angry.

"I replied that no such order had reached me, and he then peremptorily ordered me back to my quarters, and hastened away to join General Scott and the rest of the staff, who had not stopped.

"I returned across the field to my quarters, feeling much injured, for I had not knowingly committed any breach of discipline. I complained to my fellow officers of Major Lee's treatment of me. Scarcely had I finished my story when I was told that there was an officer outside who wished to see me, and I was greatly surprised to find Major Lee seated there upon his horse. He saluted and I returned the salute.

"Lieutenant McClellan," said he, "I fear that in our meeting just now I was disconcerted in tone or manner, and I have come to express to you the regret which, under the circumstances, a gentleman should."

"I assured him that it was all right, and with a salute and a low bow, which I feebly returned, he rode away, leaving me lost in admiration of a superior officer who could so promptly and so generously repair an error."—Baltimore Sun.

"He LOVED HIS MASTER.

Two Stories of Sosimo Robert Louis Stevenson's Faithful Samoan Kody Servant.

The other day the cook was away, and Louis, who was busy writing, took his meals in his room. Knowing there was no one to cook his lunch, he told Sosimo to bring him some bread and cheese. To his surprise, he was served with an excellent meal—an omelet, a good salad and perfect coffee.

"Who cooked this?" asked Louis, in Sosimo.

"Well," said Sosimo, "great is your wisdom."

Sosimo bowed and corrected him—

"Great is my love!"

Long ago Louis had a topaz and that was somewhat difficult to put into his shirt, so he gave it to me. I put it away in my trinket box and was annoyed, when I first wanted to wear it, to find it gone. Sosimo had missed the stud, discovered it in my box and carried it back to Louis' room. I kept up the fight for some time, trying to secure it from Sosimo by putting it in and out of the way places, but it was invariably found in Louis' room, no matter where I had hidden it.

When he came up from the ship he put Louis' valise down on the veranda and carefully abstracted from his mouth the precious stud he had carried there for safety. I gave up, then and it is now Louis' own."—Robert Louis Stevenson's "Home Life," by Isobel Strong, in Scribner's.

Their Hobbies.

Some gossip in Cassell's Magazine tells what are the hobbies or amusement of some of England's great men. Mr. Balfour indulges in golf, bicycles and philosophy, and he once played Hamlet; Lord Salisbury studies silence and tries experiments with a test tube; Mr. Chamberlain raises orchids; Mr. Gladstone, of course, used to chop trees, and now reads Greek when he feels the need of rest; Prince Bismarck drinks beer, smokes and reads *Die Boisgob*; the Prince of Wales is fond of bowling; the Duke of Devonshire, Sir John Milnes, Andrew Lang and William Black are expert fishermen, while Mr. Toole finds something funny to do or say almost every hour of the day. Once he sent a package of chocolates to a little boy who sat in a stage box and was disturbing him with his astonishingly loud laughter. The attendant delivered the packet, "With Mr. Toole's compliments, and would the young gentleman who laughed so heartily kindly eat these during the performance?"

Newspapers in New Jersey.

There are about 300 newspapers published in New Jersey, of which 76 are Republican, 70 Democratic and 66 nominally independent. There are 24 German newspapers, 4 Italian newspapers and 1 newspaper printed in Hollandese. Two papers are published by colored men. This is an average of 1 newspaper to every 2,118 males of all ages in New Jersey, or to every 1,135 of the legal voters of the state that voted in the last presidential election.—Newark Advertiser.

All British patents are granted for 14 years, but are revoked at any time after the fourth year upon the nonpayment of the government tax.

DUST BY ACTUAL COUNT.

A Scientist Has Numbered the Dust Particles in the Very Furtive Air.

It has always been believed that there could be no dust in the air of midocean, or upon mountain peaks thousands of feet above the sea level where the snows are eternal. But science has recently demonstrated that such is not the case. It has even gone farther than finding dust in these places. It has counted, with the utmost accuracy, the number of particles in a cubic centimeter.

Dust measurements were made from air over the open ocean and in mountain regions at altitudes from 8,000 feet to more than 18,000 feet. On the Alps, in Switzerland, which forms part of the Alpine chain, containing the Rothorn and Weisshorn, rising about 9,000 feet above the Zermatt valley on the east, and some 8,000 feet from that of Zermatt on the west, the observations showed that at an elevation of 6,700 feet there were 950 dust particles in a cubic centimeter, which measures a little over one-third of an inch. At 8,400 feet elevation only 513 dust particles were found, and at 18,600 feet above the sea the number diminished to 167 per cubic centimeter.
